Subject: Placer Mining Claim Known as Travertine Mine # 8 TWP. 22 S-Range 16
E, NE 1/4, SW 1/4, Section 25

This letter is to obtain the following changes and approval on our Placer Mining Ground, so that we may expedite the operation of this mine. Each of these issues were discussed at length with Bureau of Land Management, Representative from Utah District Anthony A Galegos, and Brent Northrup Representative from Moab District last week in our meeting. The items of interest are as follows:

1. We need a loading and unloading area for our equipment. The road that we have presently to the mine is not adequate for the lowboy tractor trailers to unload and load. So we have chosen the closest and most suitable area for the job. Which will be approximately fifty yards square, located at the Y where our Salt Wash mine road leaves Geyser Bike trail road, approximately four miles east of our mine
2. Our next land use request, is for a stocking and staging area approximately one hundred and fifty square yards in front of or east connected to the mine. Detailed of use of stocking and staging area is to separate, stock and store products of the mine, until they can be transported.
3. Our next problem is fuel storage. We will need permission for two items pertaining to fuel first is to have an occasional fuel truck to deliver fuel for our equipment. Primarily we will haul the fuel using a fifty five-gallon containers, using our pick up truck. Hauling the fuel container back out of the area with us when we leave.
4. We request permission for a trash bin or cans to be used and hauled away and replaced when full.

5. Storage shed for protection and security of our tools and useable materials. On the staging area would work well an area no larger than 20 feet by 8 feet for this storage would be needed.

6. Until such storage can be obtained approval to retain a utility truck on the premises will be needed

7. At some point we may need additional equipment, estimation of this equipment is as follows:

Water truck to keep dust down

Water storage tank

Track Hoe - rubber tire loader cat 988 or similar in size

Catapillar D-9 or 10 or same

Dozer or same

Fork lift

Air compressor for breaking rock

Rock cutting saw approximately 12 feet by 12 feet by 4 feet

Rock crusher preferably a cone crusher, possibly a jaw crusher

Portable screening plant

Portable weigh scales

Portable light plant

8. Approval is also needed to store non-hazardous materials at the staging area also IE: pallets, rolls of wire, nails, ECT..

9. Approval for a motor home that is currently located on the site, as a deterrent for vandals, to be used as a guard shack until a more suitable one can be built for which will also need approval.

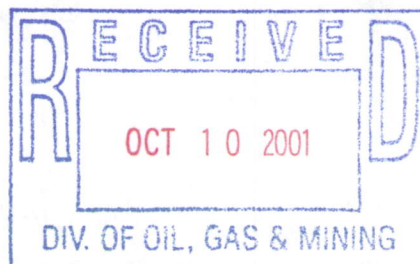

10. We also would need to facilitate on the land portable toilets. Which we will be held responsible for their maintenance and removal when no longer needed.

This should complete our needs to the best of my knowledge. We would like to say thank you for your understanding and cooperation on this matter, your help is appreciated. Should you require additional information or assistance you may contact me, Earl K. Shumway at the following.
